Gently heat the sample and mark the intensity of that aroma under 'Heated'. Quality is scored based on a culmination of the 'Ambient' fragrance and the 'Heated' aroma.</p>

<p>NOTES:</p>							FINAL SCORE:						
<h3 style="text-align:center;">Step 3</h3> <p>DRAW/EXHALE - Melt the sample, inhale, then exhale the vapor. A smooth dab would get a low intensity mark. A harsh dab would get a high intensity mark. Rate the quality of draw/exhale based on if the vapor is pleasant while inhaling and exhaling.</p> <p>FLAVOR - Represents the sample's character from the beginning to the end. The result of your entire flavor experience, including tastes, aroma, draw/exhale, body, and aftertaste. Jot down any notes that come to mind.</p> <p>AFTERTASTE - Rate the flavor qualities lingering in your mouth after exhale.</p> <p>BODY - Rate the quality of the physical sensation of the vapor inside your mouth. For example, an undesirable waxy coating will mute flavor qualities and would receive a low score. Pleasantly textured, desirable vapor would receive a high score for body.</p>					<h3 style="text-align:center;">Step 4</h3> <p>BALANCE - Rate how well the fragrance/aroma, flavor, aftertaste, and body fit together synergistically.</p> <p>OVERALL - The score here should reflect your own personal appraisal of the sample.</p> <p>RESIDUE - Rate the quality of the post dab residue. Black, gritty, or metallic like qualities would receive a low score. Residue free from impurities would receive a high score.</p>
